Overview

Tharpu Chuli known as Tent Peak is an adventurous trek which lies at the south of Annapurna Base Camp. It offers magnificent panoramic views of majestic snow-capped mountains of the Annapurna region.

If you are a well experienced trekker and want to start on to mountaineering then this climb might be the right choice for you. Tharpu Chuli which is situated at the height of 5200 meter will give you a thrilling experience. Our trail passes through beautiful old growth rhododendron forests, emerging periodically to explore the traditional Gurung villages dotted along the way as we ascend above the tree line. The alpine plants, lush forests, colorful flowers of lush forests, culturally rich local people, and snow covered mountains would surely mesmerize you with their serene beauty.

Tharpu Chuli is situated in the picturesque Annapurna Sanctuary. Enjoy the mountainous environment marveling at colorful flora and clear views of the splendid high mountains including the two eight-thou sanders: Mt. Annapurna (8091 m) and Mt. Dhaulagiri (8167m). While you trek along the fertile Modi Khola River belt, you will experience the natural grandeur as well as the cultural magnificence of most popular trekking region of Nepal. Path to the beginning of the route runs along a steep serpentine road with amazingly beautiful scenery. During the spring season, you will see the mountains tinged with red or pink. As you trek higher, you will experience why the buffer zone near the Annapurna massif is considered the most picturesque in Nepal. We pass through both Machhapuchhre and Annapurna South Base Camps, before setting our high camp on Tharpu Chuli. The first few days are spent on the south side of the Himalayas, the area of highest rainfall in Nepal, where there are lush subtropical jungles and rhododendron forests. Cozy lodges provide welcome resting places in the villages which are predominately of the Gurung ethnic group. There are amazing post-card scenes of mountains, glaciers, rock faces, and sharp ridges with the patchwork of terraced fields in the foreground. From here we make an exhilarating one day ascent on the North-West Ridge, returning to our base in one long day. Enjoy the ethnic hospitality along with the cultural magnificence of Nepal's ethnic mountain people. The views from the summit are amongst the best in Nepal, with an impressive panorama of the Annapurna Massif. Moreover, the easy accessibility of the Tent Peak makes it an ideal destination for those wishing for a short trekking plus peak climbing expedition.

Although physically this expedition is not as challenging as our Mera or Island Peak expeditions, there are some steep sections high on the ridge making this slightly more technical than Mera Peak.

Autumn (mid Sept to mid Dec) and spring (March to mid June) are the best seasons for the Annapurna Base camp trek and Tharpu Chuli climbing trip. The weather is sunny and warm, with outstanding views but the nights are cold and can fall to freezing in higher elevations.
