Her body was recovered 3 days later in river Phusre with great effort. Her father wished to name it "Davi's falls" after her. Its Nepali name is Patale Chango, which means "underworld waterfall". The waterfall during the monsoon season provides you with a natural effect which makes each photograph amazing. Gupteswor Cave is a city shrine dedicated to Lord Shiva. It is a world-famous pilgrim site. It is a limestone cave discovered some time ago and has a number of scenic spots around. The main attraction is the gigantic Shiva Linga which is said to be increasing in size. Gupteswor cave is special for the underground water. It is really worth seeing. It is a natural cave with Stalagmites. One has to reach the end to view the superb scene. The shrine is called "Gupteswor" which means the "Hidden God". It is so named because it was lying hidden in the cave for a very long period. People suffering from incurable diseases come here to worship the God and remain here for months in the hope of getting cured. You might need some focus light while capturing pictures of this cave. Mahendra Cave is a cave located close to the Seti River. It is a rare example of a cave system in Nepal containing stalagmites and stalactites. This cave was discovered in the late 1950s by young shepherds of Pokhara. Since then it has remained one of the most visited places in Pokhara. The canal is completely dark with continuously dripping water overhead. The cave is full of limestone, which falls to the ground and continuously forms electrical sparks. Bat Cave, which is also known as the natural habitat of bats, is also worth of visiting, and is, located a ten-minute walk away from Mahendra Cave. It is 150 m long and 25 ft. high. The main entrance of this cave is quite narrow but the inner part is wide enough. The main specialty of this cave is that there are more than 15 thousand bats of different species. Images of elephant tusks, gods, and goddesses can be observed in the inner walls of the cave. Here, you can click pictures of various species of Bat under one cave. Bindhyabasini temple is the center of religious activity situated in the small hill-lock in between the main old bazaar and Bagar area at an elevation of 3000 feet above sea level. It is one of the oldest temples in the Pokhara valley and has an immense cultural value dedicated to Goddess Bhagawati. This temple is considered as one of the main and foremost Shaktipiths of western

Nepal. It is heard to have been expressed that one can materialize the wishes whatever one wishes by worshipping the Devi. Built in a Shikhar Shailee (Shikhar style) the temple has an Idol of Bhagawati having 8 Bhujas (hands). Seti George is also known as Seti Khola, where "Seti" means "White" and "Khola" means "River". This is the holiest river of western Nepal, which is fed by snow of Machapuchare and Annapurna mountains.
